Press Release

DuoShare Receives DPV™ Software Manufacturer and License Approval

Dallas, Texas, January 21, 2005: The United States Postal Service® has approved DuoShare, Inc., creator of the first J2EE™ CASS Certified™ postal address matching service, as a Certified DPV™ Software Manufacturer and Licensee. The USPS® developed the Delivery Point Validation data product to aid in the identification of inaccurate addresses and reduce the amount of Undeliverable-as-Addressed mail. The DuoShare Postal™ application utilizes Postal Service™ DPV data during Address Validation, enabling customers to verify whether addresses are known deliverable addresses before mailing.

Stephen Buck, Vice President of DuoShare, explains that Delivery Point Validation is an important element of DuoShare PostalSM. "Since misdirected mail represents costs much greater than the postage and printing lost, we are focused on getting our customers' lists 100% accurate."

In addition to obtaining accurate addresses, companies that use a CASS Certified mail service can qualify for postal discounts. While the number of CASS™ vendors decreases, DuoShare enters the market with the ability to offer small businesses as well as large a cost-effective address quality service. By using DuoShare Postal, companies usually see cash savings on the first mailing, including processing charges, followed by increased savings on subsequent mailings. DuoShare offers functionality and service unmatched by other CASS vendors, including the capability for multiple users to fix bad addresses during validation and full service assistance to end users throughout the process.

DuoShare Postal Address ServicesSM are offered on a value-added processing unit basis, with no minimum charge, no contract, and no long-term commitment. For more information, call DuoShare or visit the website at <http://duoshare.com>.

DuoShare, Inc. is a privately held software services company based in Dallas, Texas, founded in 2001 to create specific business processes and services and deliver those via the Internet. DuoShare Postal is a small portion of a larger software application offering companies the flexibility to integrate key business functions in a vendor-neutral environment and at a reduced cost.
